

THE EDINBURGH PARTNERSHIP SURVEY

Results for low-income households

David Porteous, Strategy Manager (Insight)

david.porteous@edinburgh.gov.uk

Method and Sampling

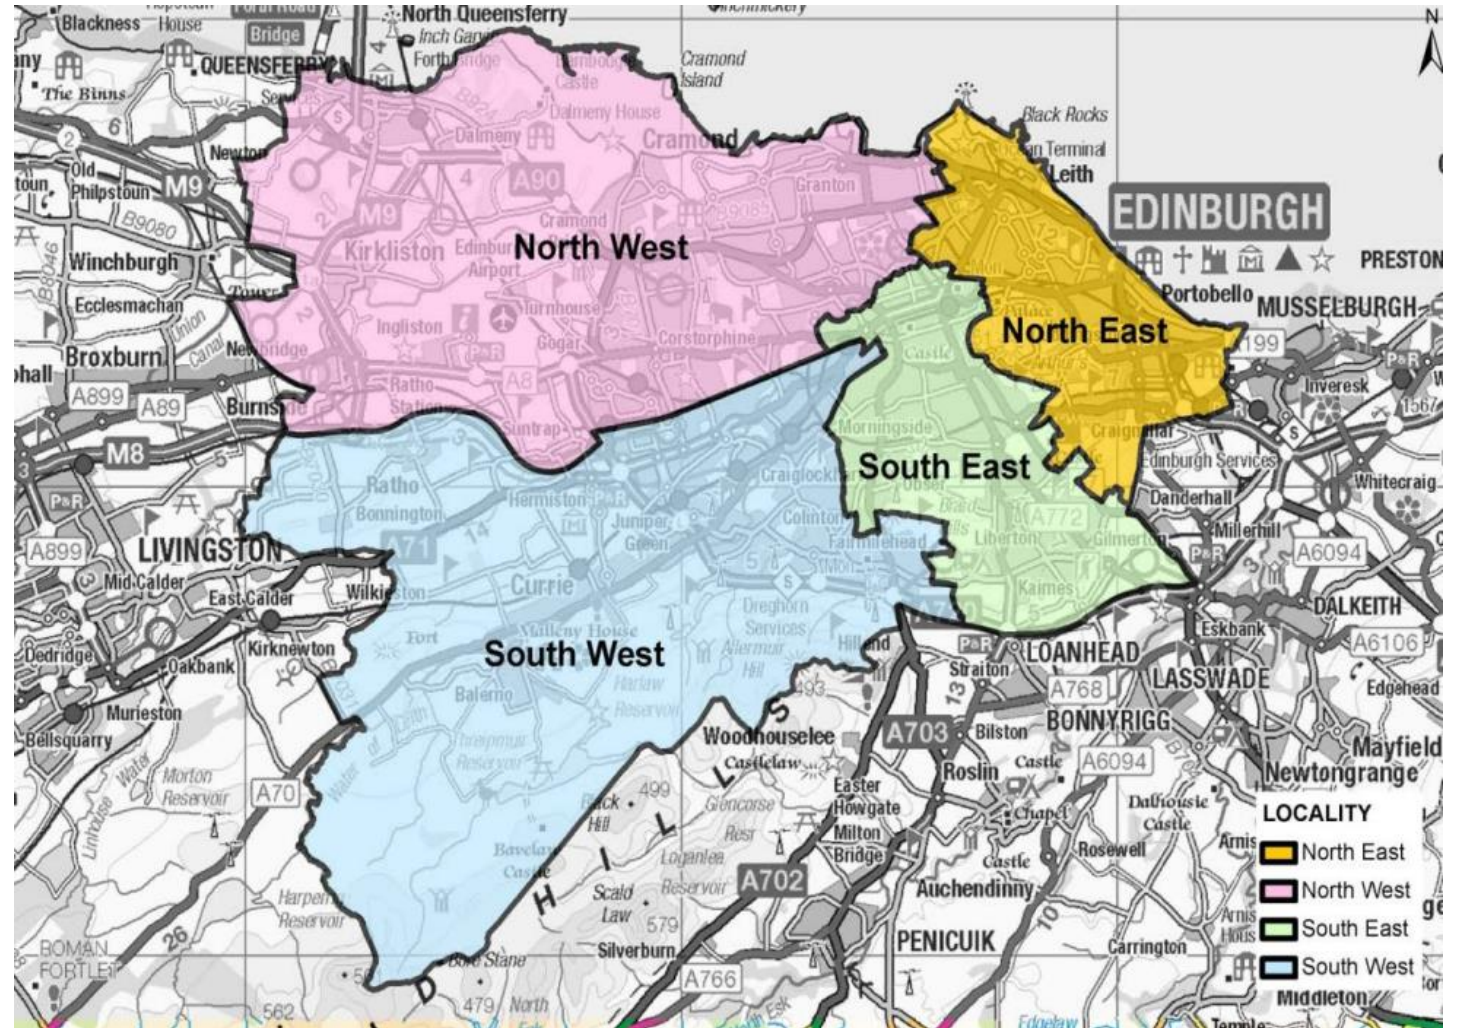

3,736 participants interviewed in street, with between 181 and 241 interviews per electoral ward

Representative by age and sex within localities, with roughly equal samples in each locality

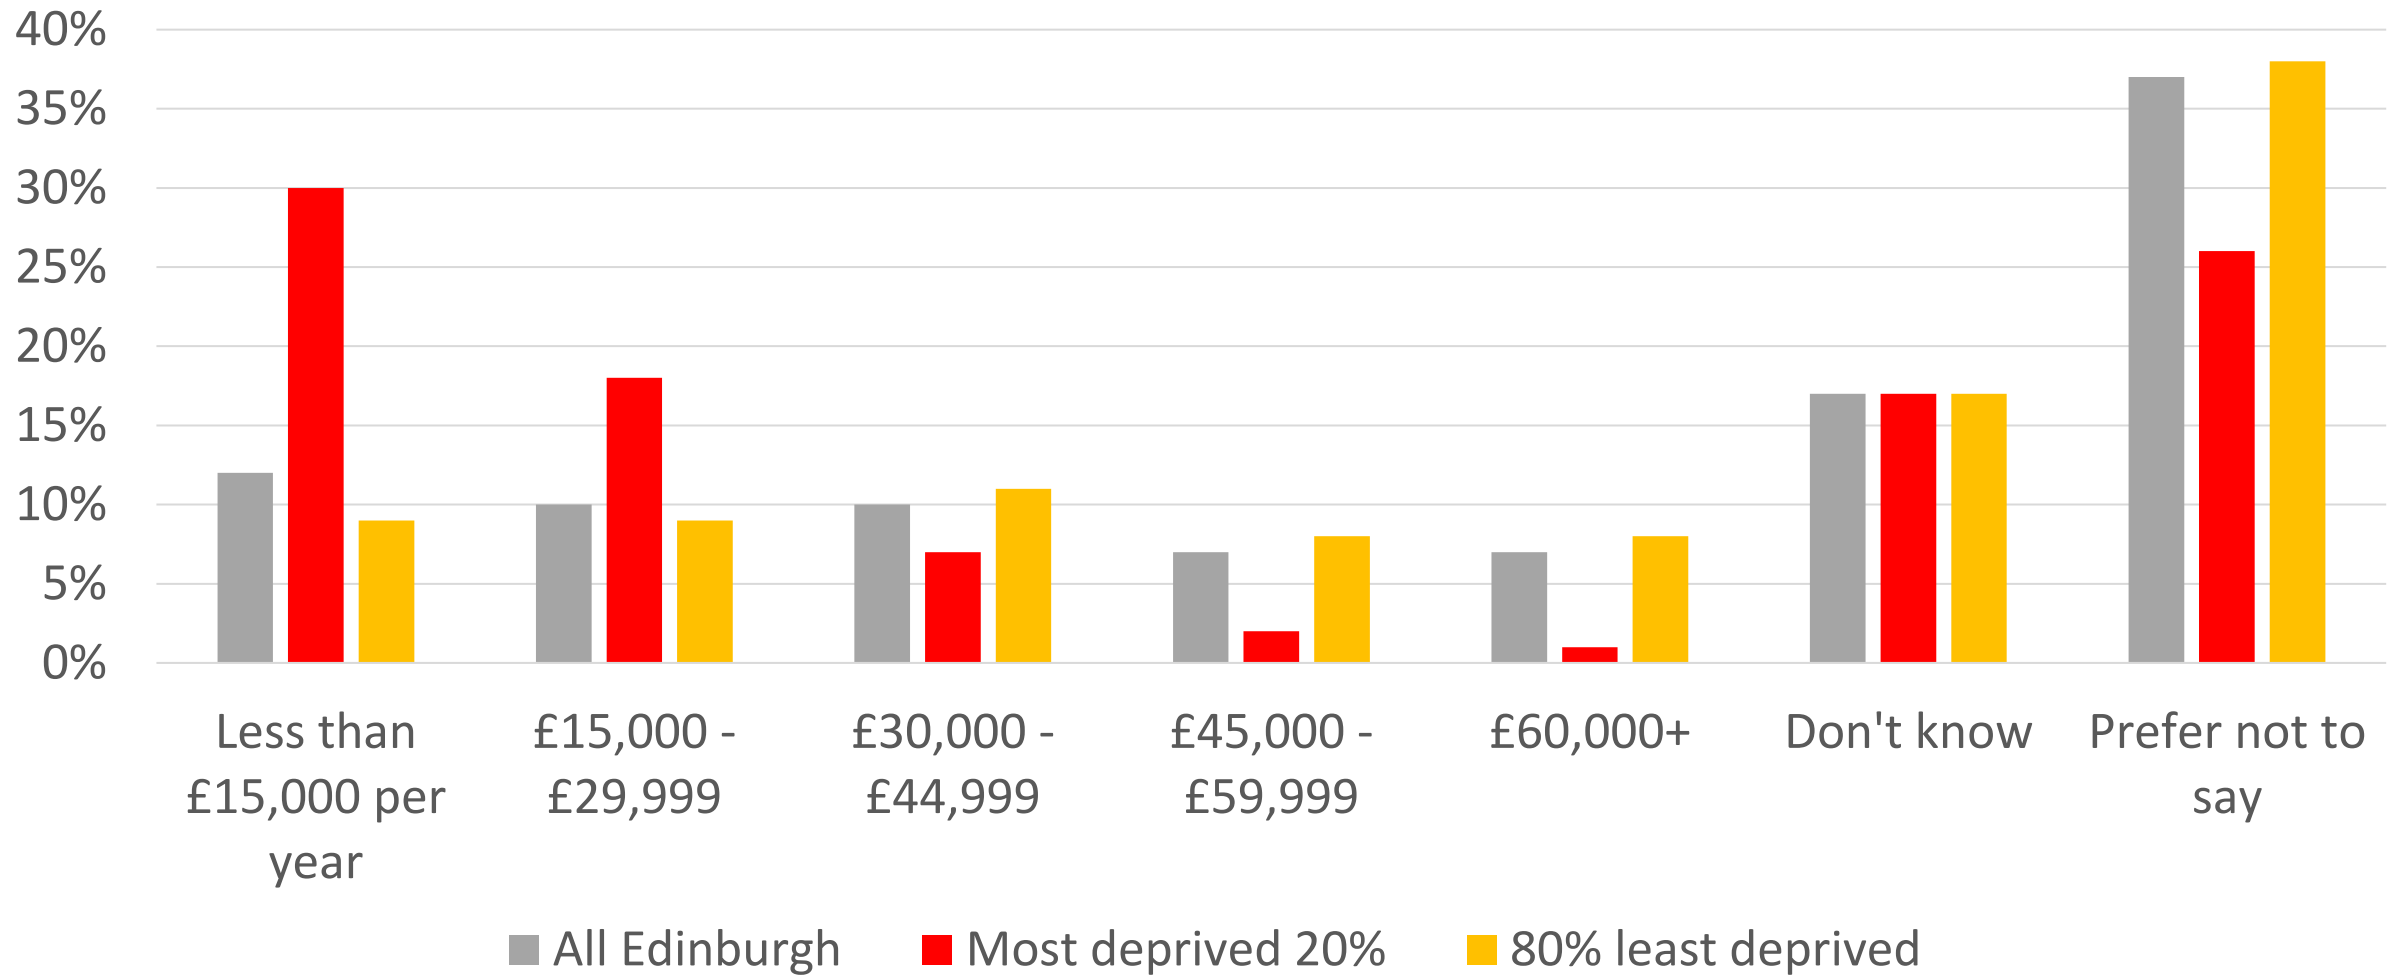

17% (640) were from non-white and/or non-British backgrounds

14% (522) were from the 20% most SIMD deprived areas in Scotland

12% (452) reported a household income of less than £15,000 per year

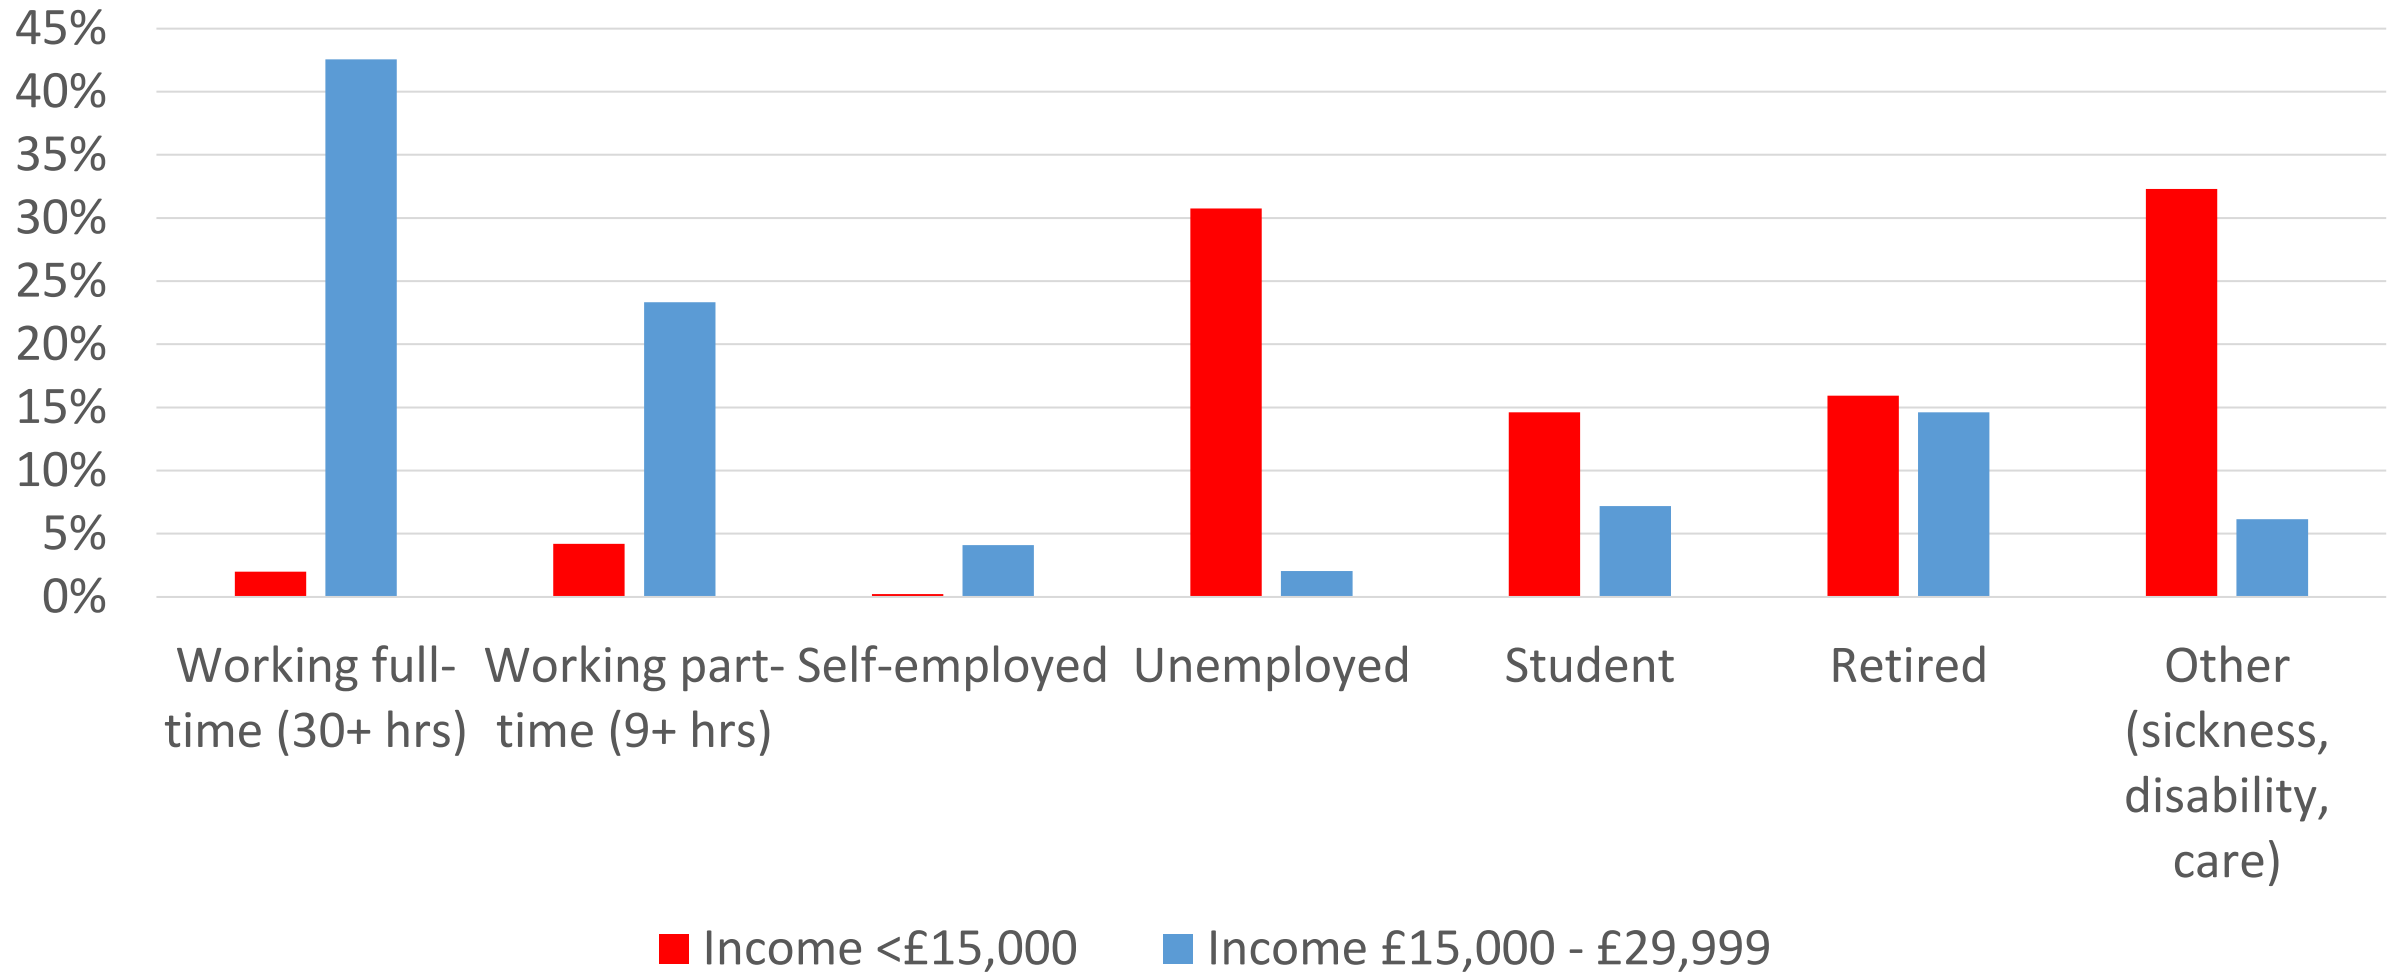

Income and deprivation distributions (3,736 responses)

Income and deprivation distributions (452 responses <£15k, 390 responses £15-£30k)

12% of those earning under £15k are care-experienced vs 2% of all others
